**Why does education matter?**

- Higher income
- Better job opportunities
- Improved health
- More civic involvement
- Lower public assistance

**What is your community’s story?**

Every community has a unique story to tell. Many things contribute to the success of a community, but research shows that the key is a high-quality education system. This Community Profile shares data about how students in your community are progressing along their educational path. The full story of your community cannot be told by numbers alone - it must also be told through the stories and experiences of all the people who live there. This profile is meant to be a guide to help you and your neighbors explore how to pave the path to a larger life through education.

The power to transform your community is in your hands. All it takes is one. One person to begin the conversation. One person stepping forward to change the future of a community.

**What can you do?**

**1.** Start by using this Community Profile to identify areas of your community’s education performance you want to change. Share with a neighbor and ask questions like:
- What surprises you most? Why?
- What thrills you?
- Do these numbers reflect your experience?
- What disappoints you?

**2.** Find one thing you want to change and start digging deeper. Ask questions like:
- Which students are at risk of falling off the path to success?
- Who can tell us more about why this is happening?
- What is needed to see positive change?
- What resources are available in the community to help?
- What other information do we need to understand this issue?

**3.** Seek out people in your community to find answers. Bring others into the conversation. Push your friends and neighbors to think differently about how education works, and then take action together.
Later as they browse the Internet, your ad displays on their site.

Preschool Enrollment
- District: 38%
- State: 42%

Kindergarten Readiness
- District: 47%
- State: 51%

3rd Grade Proficiency
- READING
  - District: 34%
  - State: 52%
- MATH
  - District: 26%
  - State: 47%

Over 85% of brain development occurs before age 5. The return on investment for preschool is $5 for every $1 invested.

Kids who start kindergarten behind are less likely to do well in later school years.

At this point, students increasingly need to "read to learn," not just "learn to read," so proficiency is critical.

This data and the lived experience of your neighbors tell the story of where your community is now, and where it is headed.

By 2020, 62% of jobs in Kentucky will require some postsecondary education.

Achievement in 8th grade is a critical indicator of whether a student is prepared for the increased academic challenges of high school.

8th Grade Proficiency
- READING
  - District: 61%
  - State: 63%
- MATH
  - District: 36%
  - State: 46%

High school graduation is a minimum and necessary step in the transition to college and a career.

By 2020, 62% of jobs in Kentucky will require some postsecondary education.

Not only will more jobs in the future require some postsecondary education, but earnings for those with bachelor's degrees are 50% higher than those without a degree.

Graduation Rate
- District: 96%
- State: 90%

Postsecondary Enrollment
- District: 58%
- State: 53%

Postsecondary Attainment
- District: 27%
- State: 35%
But not all students start at the same place. Most gaps persist from kindergarten to graduation, confirming that improvement is needed at all grade levels.

Gaps are already visible early in the education pipeline. Most gaps persist from kindergarten to graduation, confirming that improvement is needed at all grade levels.

NOTE: If a data point on a line is missing or part of group’s line does not appear, data for that student group is unavailable. This may be due to concerns for student privacy, typically due to small sample size or results for students being similar enough that individual students may be identifiable.
### Economic Outcomes
